.NET Developer with 2 years of experience developing applications using **C#, ASP.NET, SQL Server, React, and Node.js**. Experienced in **REST APIs**, relational databases, **Object-Oriented Programming (OOP)**, and **3-tier and N-tier architectures**, with a strong focus on software development best practices and source control using **Git/GitHub**.

PROFESSIONAL EXPERIENCE

Full Stack Web Development

Spirit Computación

December 2023 – June 2026

- Developed enterprise web applications using **React, Node.js, JavaScript, HTML5, CSS3, and Bootstrap**.
- Implemented **REST APIs** for communication between frontend, backend, and MySQL databases.
- Designed and managed **MySQL databases**, optimizing queries and data structures.
- Created data models and technical documentation using **Toad Data Modeler** and **UML diagrams**.
- Managed source code using **Git/GitHub** within development teams.

Freelance Project

Café NEBARO

July 2026

- Developed a web application using **React, JavaScript, and Tailwind CSS**.
- Implemented a responsive and optimized interface for different devices.
- Configured website deployment and domain management.
- Managed the project using **Git/GitHub**.

PROJECTS

WorkFocus

August 2026

- Developed a productivity application using **C#, .NET, Object-Oriented Programming (OOP), and 3-tier architecture**.
- Designed an **Offline-First** architecture using **SQLite**, with future synchronization with **PostgreSQL** through **REST APIs**.
- Designed the database, repositories, technical documentation, and **ER/UML diagrams**.
- Technologies: **C#, .NET, SQLite, PostgreSQL, Git, UML**.

☆ *Habilidades utilizadas*

Energym Management System

December 2024 – April 2025

Academic project developed as part of the Systems Engineering degree.

- Developed a desktop application using **C#, Windows Forms, and SQL Server**.
- Applied **Object-Oriented Programming (OOP)** principles using **N-tier architecture**.
- Designed the database using **Case Studio** and documented the solution with **UML diagrams**.
- Integrated an **Arduino-based biometric device** for access control.

☆ *Habilidades utilizadas*

PROJECTS

Mundo Conectado Management System

July 2023 – November 2023

Academic project developed as part of the Systems Engineering degree.

- Developed a desktop application using **C#, Windows Forms, and SQL Server**.
- Implemented an architecture based on **Object-Oriented Programming (OOP) and N-tier architecture**.
- Participated in **requirements gathering** with a real-world client.
- Designed the database and created technical documentation using **Case Studio** and **StarUML**.

☆ *Habilidades utilizadas*

EDUCATION

Systems Engineering, Informatics and Computer Science

Universidad de Occidente, Quetzaltenango

January 2020 – November 2023

Degree obtained: **Systems Engineer**

Industrial High School Diploma with a Specialization in Computer Science

Colegio Seminario San José –

Quetzaltenango

January 2017 – September 2019

Incluye cursos relevantes, honores, nota (si es destacable), y cualquier proyecto o investigación significativo. Menciona formación especializada o certificaciones si es aplicable.

TECHNICAL SKILLS

Languages: C#, JavaScript, SQL

Frameworks & Technologies: ASP.NET, React, Node.js, .NET

Databases: SQL Server, MySQL, PostgreSQL, SQLite

Tools: Git, GitHub, UML, Case Studio, Toad Data Modeler, StarUML

LANGUAGES

Spanish: Native

English: A2
